DETAILED ACTION

1. Applicants election has been received and fully considered. In view of the applicant's remarks claim 35 has been added to the elected Group. The remainder of the restriction requirement has been reviewed and is deemed proper. Accordingly, the restriction requirement is hereby made FINAL.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19-24, 35 are rejected under 35 U.S.C. 102(b) as being anticipated by LoRusso et al. US Patent 5,377,6542.

LoRusso has disclosed the invention as claimed showing a control apparatus (EEC 18) for an engine in which the operation angle (the intake valve lift) for each individual cylinder is controlled to reduce variation among the cylinders.

Note by controlling the valve lift for each cylinder that the air-fuel ratio is also controlled to reduce variation among the cylinders. The control apparatus also controls the fuel quantity (the fuel charge) on the basis of a correction signal.
